Saab receives order for Carl-Gustaf ammunition from Estonia

Saab has received an order from the Estonian Centre for Defence Investment on ammunition for the Carl-Gustaf® system. The order value is 186 MSEK and deliveries will be made during 2018-2019.

The order is placed under a Framework Agreement signed with the Swedish Defence Materiel Administration where Estonia has the possibility to place orders from Saab.

"This is a further proof of the trust our customer put in the Carl-Gustaf system and the capability it creates for the defence forces" says Görgen Johansson, Senior Vice President and head of Saabs business area Dynamics.

The Carl-Gustaf M4 is the latest version of the combat proven, shoulder-launched, multi-role weapon system currently being fielded with multiple armed forces around the world. It gives users a wide range of engagement options and allows troops to remain agile and effective in any scenario. Building on the system's already formidable capabilities, the M4 offers a higher degree of accuracy, lighter construction as well as compatibility with future innovations.
